

I claim : the right for the all the concepts in the invention and their applications.

Concept of sink energy and all its applications

Concept of delta and Y and all its applications applied on normal or sink electricity (three, four, five, etc... phases) (including design, production and sales)

Concept of sink energy applied on computers, machinery, motors, generators, electronic ships and electronic circuits (including resistances, capacitors and inductances) and all related formulas and circuits (design, production and sales).

I claim : the right for the generation and sale of sink electricity.

Sink electricity generator (design, production and sales)

*production of sink energy from cooled substances (as described in the test)*

All related production features and sales. *(cooled materials can create sink energy, and sink current could be withdrawn from it.)*

I claim : the right for the design, production and sale of computers on three digits logic (0,1,2)

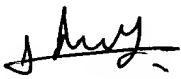

Including design, production and sale of electronic ships working on three or two inputs (sink electricity, normal electricity, and neutral)

all related applications on software (programs and logic).

Including design, production and sale of CD's, floppy, disks etc...

All related items to computers

T0T290T2298860

I claim : the right for the design, production and sale of all machinery (including motors, generators) working on two or three inputs (sink electricity, normal electricity, neutral)

Including design, production and sales of cooling resistances, capacitors and inductances and all related circuits.

I claim : the right for the application of the concept of sink energy on telecommunication

design, production and sale of cellphones, TV and all portable and non portable items (phone books, calculators, etc...).

design, production and sale of receivers, dishes and all their accessories (including cable TV). *and satellite dishes.*

The right for all the Applications on internet and all related software, and hardware.

All audio and video systems (speakers, amplifiers, equalizers, etc...)  
(including radio and TV stations)

*all receiving items and their accessories.*
